## **Overview of PY 2012Q4 WIASRD File**

The Workforce Investment Act Standardized Record Data (WIASRD) is the major reporting system that the Department of Labor (DOL) uses to obtain information about the individuals served, services provided, and outcomes attained under Title I-B of the Workforce Investment Act (WIA).

Before PY 2009Q3, the WIASRD data were submitted annually by states to DOL. Since then, data have been submitted quarterly.

### **Universe**

The PY 2012Q4 Public Use WIASRD file contains information on individuals who were served by WIA programs between January 1, 2011 and June 30, 2013, the last two quarters of PY 2010, all of PY 2011, and the four quarters of PY 2012. It contains everyone who began participation before July 1, 2013 and either exited on or after January 1, 2011 or had not exited as of March 31, 2013. It includes information on individuals served by local funds, statewide funds, or National Emergency Grants (NEGs). Individuals served only by some particular statewide programs are, however, excluded. Those excluded are individuals served only by rapid response, statewide incumbent worker programs, and other statewide programs that have been excluded from performance measurement because they are highly specialized or have their own specific goals.

### **Information Provided by the WIASRD**

The WIASRD provides information about individuals served by WIA Title I-B and NEG programs. The data are provided in three sections:

- I. Individual Information. This section provides basic information on WIA participants, including date of birth, gender, race/ethnicity, disability status, and demographic characteristics. This information is gathered at application to the program or when eligibility for intensive services is determined and is not updated subsequently. For example, highest grade completed represents the education level at either application or when eligibility for intensive services is determined. It is not updated if the person completes additional education during program participation.
- II. Activity and Services Information Record. This section provides information on participation in WIA programs, participation in partner programs, receipt of intensive services, the type of training received, and the receipt of supportive services. Services are counted if (1) they were funded by WIA or (2) they were partially or completely funded by partner programs and were coordinated with the individual's WIA activities, possibly through formal co-enrollment or by inclusion in the individual's WIA service plan. Reporting of most partner-funded services is optional.
- III. A. Program Outcomes for Adults, Dislocated Workers, and Older Youth. This section provides information on the outcomes received by WIA exiters other than younger youth. These outcomes typically represent achievements after exit from WIA. Many of these outcomes are based on data derived from UI wage records, which is the primary source of employment information. Due to the lags in availability of wage records, outcome data on the data file is missing for many exiters. These data will be collected in subsequent years' WIASRD submissions.  
B. Outcomes for Youth. This section contains outcome information for youth.  
C. Literacy and Numeracy. This section contains information on literacy and numeracy outcomes for youth.
- IV. Calculated Variables. This version of the WIASRD file contains calculated variables intended to make the data easier to use. These calculated variables were not submitted by states; rather they were calculated based on the standard WIASRD fields. They include calculations of the WIA performance measures. These data provide substantial information on WIA exiters, their characteristics, the services they receive, and the outcomes they attain.

## **Data Structure**

There is generally one record for each person for a period of participation, regardless of the number of funding streams that served the individual.<sup>1</sup> Unique records are defined by three fields: the state, individual ID and the exit date. Records with overlapping periods of participation and records with periods of participation separated by less than 90 days are combined into a single record.

The data available for an individual depend on the funding streams that provided services to the individual. The four funding streams are:

- **Adult** local and statewide funds
- **Dislocated worker** local and statewide funds and National Emergency Grants
- **Older youth** (age 19 - 22) local and statewide funds
- **Younger youth** (age 14 - 18) local and statewide funds

For adults and dislocated workers the data available also depend on services received. Some data items are available only for adults and dislocated workers that received intensive or training services.

When items are not available for an individual, the data in the field is blank. **Blanks should not be treated as zero or 'no'.**

Because some items are available only for subsets of the data, the user should be aware of when the items being examined are available.

If an individual was served by more than one funding stream that person's data should include the data required for each of the serving funding streams. As a result, some items will be available in unexpected situations. For example, fields required only for adults and dislocated workers will be available for youth who also received adult services.

## **Data Cleaning**

In developing the public use files, we conducted some limited data cleaning. Our approach to data cleaning was to make changes to the data only when there was a clear and obvious problem. Thus, the user of the data should not assume that the data have been completely cleaned. In particular, we:

- Set to missing (blank) all zeros used to denote missing. The reporting instructions allow states to use either zero or blank to denote that data is missing in many fields.
- Removed invalid codes for categorical items. For example, codes other than '1' or '2' in "yes," "no" items were set to missing (coded as blank).
- Set to missing (blank) some data items in states that appeared to be reporting incorrectly. Only obvious problems were treated this way. Other cases of incorrect reporting may still exist at the state or LWIB level.
- Set to missing (blank) those items that were not supposed to be reported for a given funding stream or service mix.
- Set to missing (blank) outcomes when it was too soon to report complete data on the submission date.
- Recoded a few items where it was possible to correct invalid coding used by states.
- Combined duplicate records. Records with overlapping periods of participation or with periods of participation separated by less than 90 days are considered to be duplicates.

---

<sup>1</sup> There are exceptions that allow multiple records for a person, such as when the individual is served independently by two WIA programs. However, these records have been combined in this data set.

- Changed date formats from YYYYMMDD to MM/DD/YYYY.

Details on data cleaning are presented in Appendix B.

### ***Calculated Variables***

A set of calculated variables has been added to the file, starting with Item 901. These calculated variables are intended to make the file easier to use. All calculated variables are based solely on the data submitted by states. These calculated variables are listed in the record layout. Definitions of complex calculated variables are provided in Appendix C.

### ***Confidentiality***

The Public Use File has been modified to help assure participant confidentiality as follows:

- If a local area (WIB) had 50 or fewer exiters in a program year, those exiters were excluded from the file. This deletion, did not apply to statewide programs or NEG projects.
- The ID was changed using a one-to-one transformation.
- The date of birth was set to missing (blank) and a calculated integer age was provided.
- The NEG project IDs were set to missing (blank) if there were fewer than 3 exiters in a program year for any project ID. A calculated variable identifying NEG participants was provided.

Leave "blank" if the youth did not receive a post-test during his/her third year of participation in the program. <u>Additional Note:</u> For WIASRD Elements #713-715, these fields are <u>only reported</u> for youth who remain basic skills deficient and continue to participate in the program for a third full year. At the completion of the third year, the individual should be post-tested and the information reported in these fields. To determine an increase of one or more levels, the individual's post-test scores from the third year in the program will be compared to the scores from the test that was administered at the completion of the second year.	MM/DD/YYYY						R	R

714	Post-Test Score (Year #3)	IN 3	Record the raw scale score achieved by the youth participant. <b>Record 000</b> or leave "blank" if the youth did not receive a post-test during his/her third year of participation in the program.	000						R	R

716 to 743	Information on Additional Functional Areas		The collection of ABE/ESL assessment data for youth who are basic skills deficient is organized according to the Type of Assessment Test and Functional Area, providing space for the collection of up to 3 annual post-test scores in each functional area. Additional space has been provided on the record layout so that information on youth achievement in more than one functional area (e.g., reading, mathematics) can be reported as needed to fully reflect progress toward literacy or numeracy gains. For example, if the youth is assessed using TABE 9-10 in Reading and Math, data elements 702-715 will be used to track achievement in the Reading functional area (if necessary, for up to 3 full years) and then repeat to track achievement in the Math functional area (if necessary, for up to 3 full years) using the additional spaces 716-729 provided on the record layout.
